E-Blitz Basic Data

Project Title: Int'l - Web Based Doc Approval Process

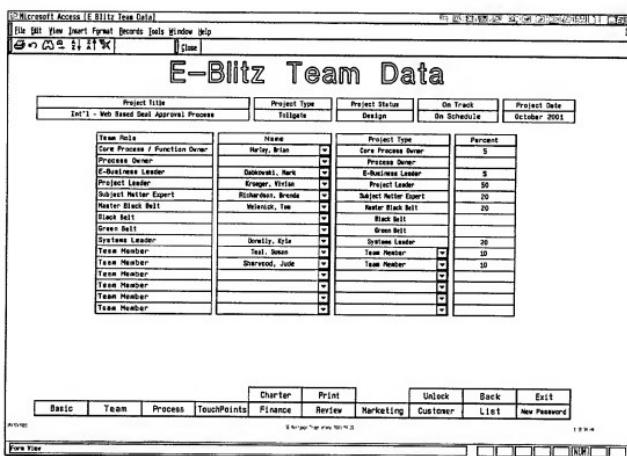

Project Description		Description Of Opportunity / Benefits																			
<p>A web-based system to allow the posting of draft documents for electronic review and approval. Electronic notifications will be sent to all parties involved who can review the document on their own, make comments, ask questions, request a meeting and electronically approve it.</p>		<p>Currently not process it very well. Country businesses send the approvals via fax, require a physical meeting, and the process is slow. This is a waste of time and money. This leads to follow-up meetings with senior management required for final approval. A web-based system would reduce the need for physical meetings and lead to senior management. A web-based system for doc approvals would digitize this process, reduce cycle time, standardize the approval process, provide instant feedback, e-mail notifications, and electronic approvals through a security system.</p>
